

Client:

Arriyadh Development Authority, Kingdom of Saudi Arabia

Key services provided:

- Parking Functional Requirements
- Parking Specifications
- Smart Parking System Consultation
- Stakeholder and Vendor Engagement

In line with the Kingdom of Saudi Arabia's 2030 Vision, the Ministry of Municipal Affairs, and the High Authority for the Development of Arriyadh, through their executive arm the Arriyadh Development Authority, appointed Surface Mobility Consultants to manage developing and administering a contract to appoint a consortium to carry out the design, build operate and transfer of an on-street and off-street smart parking management system to achieve the following high-level goals:

1. Deter illegal parking and promote short-term parking on commercial corridors
2. Enhance overall customer parking services in the city

The project consists of the following elements:

1. Rehabilitate, operate, and maintain all on-street parking spaces within the project area
2. Carry out any geometric changes or road configuration changes necessary to maximize the number of available parking spaces within the project area
3. Design, finance, construct, operate and maintain off-street parking facilities and structures, offering the maximum number of parking spaces within the project area
4. Collect parking fees and other authorized revenues and income generated by the parking facilities
5. Share revenue generated between pre-defined public agencies and private entities
6. Operate and Maintain all parking facilities (on-street and off-street) and all associated street furniture and back office systems for a period of 15 years
7. Enforce municipal parking laws and regulations and issue fines to vehicles in violations thereof
