

Smart Mobility 10 Year Master Plan

Client:

Arriyadh Development Authority, Kingdom of Saudi Arabia

Key services provided:

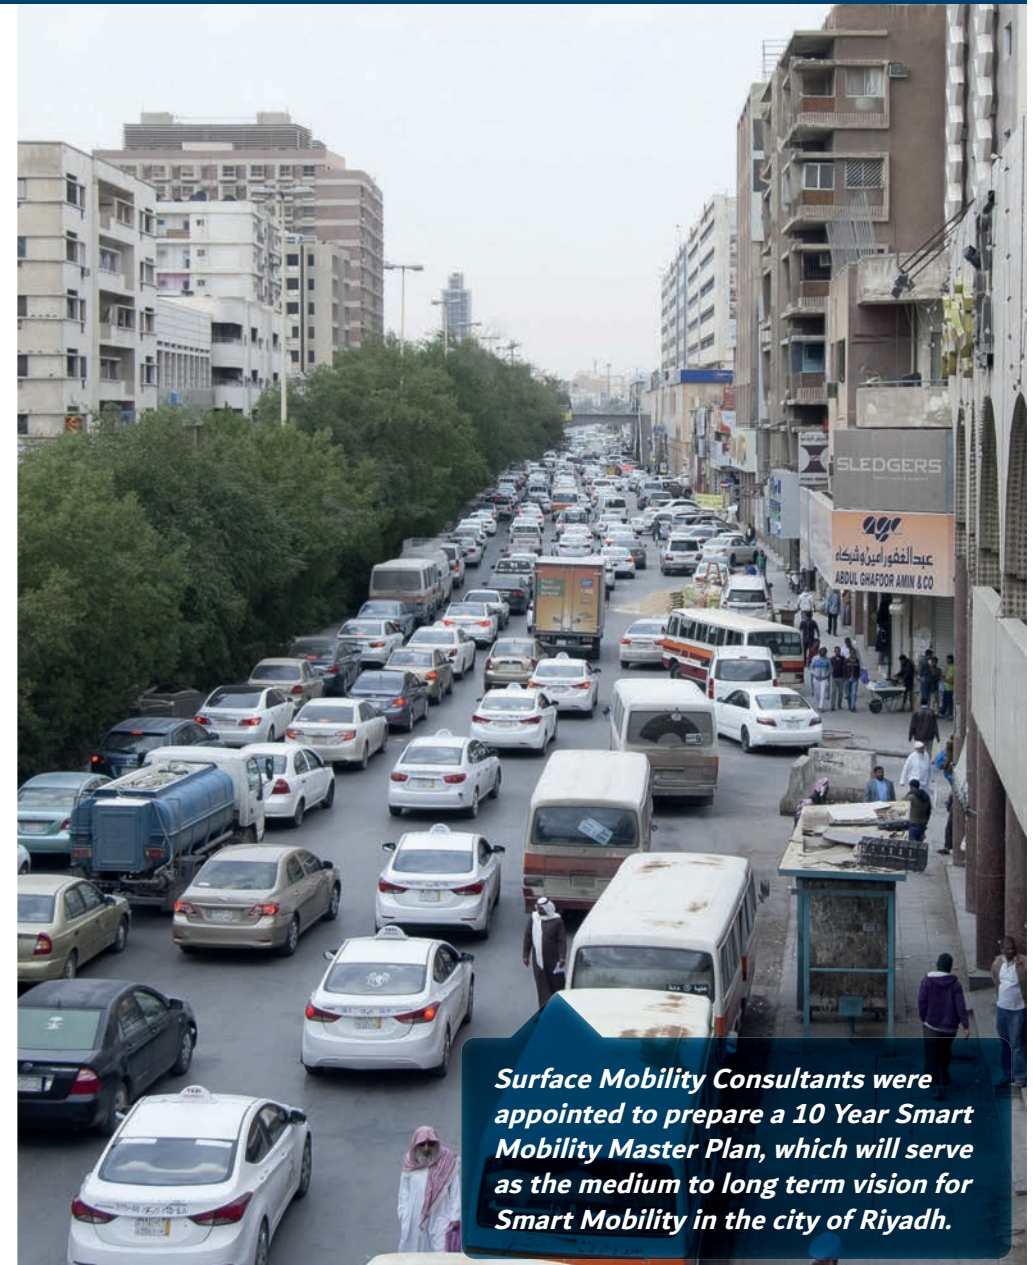

- ITS Architecture Development
- Operational Control Centre Audit
- Application of International Standards

In line with the Kingdom of Saudi Arabia's 2030 Vision, the Ministry of Municipal Affairs, and the High Authority for the Development of Arriyadh, through their executive arm the Arriyadh Development Authority, appointed Surface Mobility Consultants to prepare a 10 Year Smart Mobility Master Plan, which will serve as the medium to long term vision for Smart Mobility in the city of Riyadh.

The plan will provide mobility options that work for all people and will ensure a future that allows residents of Riyadh to meet their daily needs. The Smart Mobility Master Plan will include multimodal transportation improvement projects for the city and address all modes of transportation. The common thread tying all projects together is the concept and a need for higher-order mass transit to support high-volume transportation corridors.

The plan will assist Riyadh to become a world-class city, offering a high-quality of life with a diverse and robust economy, and connected and walkable communities.

The plan includes an Existing Conditions Report, International Benchmarking Study, Needs Assessment, Gap Analysis, ITS Action Plan, the building blocks to prepare an ITS Architecture and a road map to implementation for the next 10 years.

Surface Mobility Consultants were appointed to prepare a 10 Year Smart Mobility Master Plan, which will serve as the medium to long term vision for Smart Mobility in the city of Riyadh.
