

Stephanie Robinson

DATA ANALYST

A classically trained musician, who found similarities between playing the piano and coding and turned her attention to data science.

TELL US WHAT YOU DO FOR SURFACE MOBILITY

I have a varied role at SMC - I'm responsible for a range of tasks including gathering business requirements, writing technical reports, creating dashboards and visualizations, wrangling data, QA testing, and presenting findings to key stakeholders. Every day there's something new!

SO, EXPLAIN A "DAY-IN-YOUR-LIFE"

Wake up, feed pets, try not to die driving to work, meet with stakeholders and fulfil their requirements, try not to die driving back from work, cook dinner, play with pets, play piano, Netflix & chill, sleep!

TELL US A BIT ABOUT YOURSELF

More English than I'd like to admit.

TELL US A FUN FACT ABOUT WHAT YOU DO (THIS COULD BE RELATED TO YOUR CURRENT WORK WITH SMC, OR FROM YOUR PREVIOUS WORK)

Cleaning and processing data is probably the most time-consuming and important part of a data analyst/scientist's job role - data visualization and building predictive models doesn't take anywhere near as long!

WHAT EXCITES YOU ABOUT ITS / BIG DATA / MOBILITY OPERATIONS

The sheer volume of data available to play around with!

HOW DO YOU SEE THE MOBILITY/TRANSPORTATION INDUSTRY IN THE MIDDLE EAST?

Am awaiting a shift towards more sustainable transportation.

TELL US A FUN FACT ABOUT YOU

I often forget how short I really am

TELL US YOUR FAVOURITE JOKE OR SHARE WITH US YOUR FAVOURITE MEME

Favourite joke is too rude, as is my favourite meme. Have this instead:
